

Alessandra Trinchera (CREA)
Plant and soil diversity as drivers of agrosystem functioning:
AGROECOseqC project

Sebastien Fontaine (INRAE)
Plant-soil synchrony in nutrient cycles:
Learning from ecosystem to design sustainable agrosystems

Dylan Warren Raffa (CREA)
Role of plant community diversity and traits on agrosystem functioning

Sara Sanchez - Moreno (CSIC - INIA) Soil invertebrate functional diversity across European agroecological experiments

Margarita Ros (CEBAS - CSIC)
Assess the impacts of sustainable soil management on soil biodiversity

Ludovica Saccà (CREA)
Combined evaluation of soil C enzyme activities and functional genes in woody plantations
